

1   **ABSTRACT OF THE DISCLOSURE**

2   A remote control method for controlling electrical appliance via a home gateway  
3   proceeds with an input signal by a telephone call to initiate the main board (the host) to  
4   connect to the INTERNET. After registering to the specific DNS server to have the  
5   pre-registered IP address, the user is able to control the initiation of household electrical  
6   appliances.
